

# AMAC's Student Accommodation Manager

## SAM Overview

SAM is a secure, web-based application developed and hosted using Intuit QuickBase. SAM follows a software-as-a-service model where there is no software to install or server to own or manage. Essential functions such as system availability and backups are provided for you. SAM also provides a powerful report writer available through QuickBase. SAM offers a viable multi-user, web-based solution with minimal impact on the institutions IT department.

QuickBase owned and managed server hosting SAM V1 application
