

# AMAC TechMatch. Discover the technology to help you succeed.

Sign up for your AMAC TechMatch.  
Say hello to the technology that will make  
studying, learning and student life a lot easier.

## Study and learn in your own way.

When it comes to education, information is often presented in challenging ways. Fortunately, there are countless amazing technology products designed to help students access information. TechMatch will help you identify the right technology solution for you.

### Who conducts the AMAC TechMatch Service?

All services are provided by nationally certified experts in the fields of technology, education and/or disability.

### How much does it cost?

TechMatch Service: \$350

Funding support is available in some cases, call for details.

### How can I schedule a screening?

Contact AMAC, TechMatch Services  
404-894-8303.

## The right technology. How to get started.

The TechMatch experts from Georgia Tech's AMAC Accessibility Program will help you better understand your unique skills and explore the technology options available to meet your specific learning needs. When you complete the TechMatch Consultation and receive your personalized TechMatch Report, you'll have a specific list of the technology that will work best for you, learn how to acquire it, and receive a plan to get you started.

- Recommendations for hardware, software and resources
- Strategies for cost-effective implementation
- Training resources
- Technology funding sources
- Follow-up activities

# AMAC Accessibility

## Improve Reading

- Increase reading speed with text-to-speech
- Listen to print materials
- Improve comprehension: Get key points in a couple clicks

## Spell Better

- Write with confidence. Use the words you know not just the ones you're able to spell
- Letter by letter spelling support while you write
- Word prediction/completion

## Math Support

- Step-by-step support of mathematical concepts
- Write equations/showing work using the keyboard & mouse
- Hard to read handwritten work into legible eText

## Better Grammar

- Tools that allow you to write more independently and with confidence
- Avoid homonym mistakes i.e., there, their, they're
- Subject-verb agreement
- Use the correct words, i.e., effect, affect

## Explore the possibilities.

Here's a small sample of the many amazing technologies and features available today.

Let the AMAC TechMatch experts be your guide to understanding your unique needs, then finding, acquiring and implementing the best solution for you.

## Handwriting Technologies

- Speak to your computer and it types what you say using voice features in graphic organizers
- Turn difficult to understand handwriting into typed notes with handwriting recognition
- Record your notes and the audio of the lecture together
- Outlines & templates: features in graphic organizers

## Get Organized

- Keep information in one place so you can easily find it with cloud storage
- Appointment reminders
- Connect with others
- Remember assignments

## Computer Voice Control

- Use a microphone to control your computer with voice recognition

## Screen Enhancements

- Have the screen content read to you
- See what's on the screen better with magnifiers, tinting and masking
