

## Using SAM with the new QuickBase

### Accessibility for All

Intuit has released a new version of QuickBase and this change will slightly affect how SAM appears to you. Although the change will eventually be mandatory, Intuit is allowing us to show you how it will look before the change. During this time, you can use both the old and new version. PLEASE use this time to get accustomed with the new SAM and let us know of any problems or concerns you encounter. We will convert SAM to this new version: March 15, 2012. This guide will give an overview of using SAM during the transition.

#### Switching between versions

Once invited to preview the new QuickBase, a footer should appear at the base of your page.

*This is what the footer will look like at the bottom of your main page.*

Click on the footer to expand its contents. When you expand this link, you will see a brief description of the changes as well as a link to a PDF providing more detailed information. Click 'Preview the new QuickBase now' (highlighted in bright green) to reveal the new design.

The screenshot shows a web browser window with a blue header bar containing the text "Announcing the new QuickBase — Try it now!". Below the header, there is a white content area with the following text:

A release unlike anything we've ever done!

- New, streamlined UI
- Instantly filter and search to get answers faster
- Unified help search and built-in community access
- Mobile-friendly experience

**Preview the new QuickBase now**

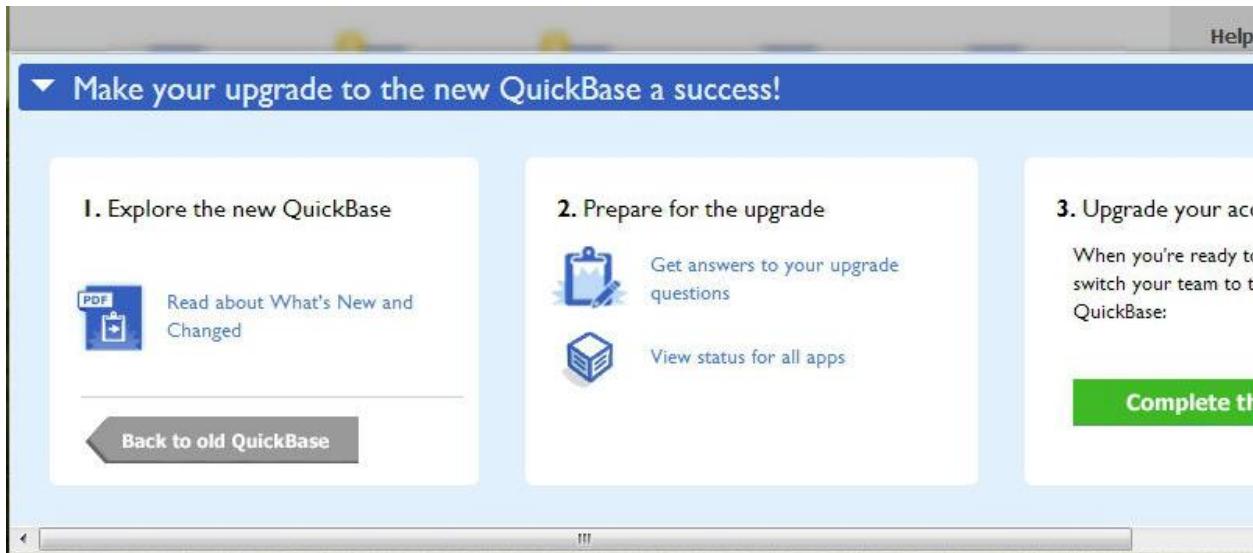

**Read about What's New and Changed**

Handwritten annotations include:

- A blue arrow points from the word "Dashboard" in the content area to the "My Apps" button in the top navigation bar.
- A blue arrow points from the words "New Reports feature" in the content area to the "REPORTS & CHARTS" button in the top navigation bar.
- A blue arrow points from the words "A new account URL" in the content area to the URL "https://MyNewUrl.QuickBase.com" in the top navigation bar.
- A blue arrow points from the words "(more about that later)" in the content area to the "SETTINGS" button in the top navigation bar.

*The expanded footer.*

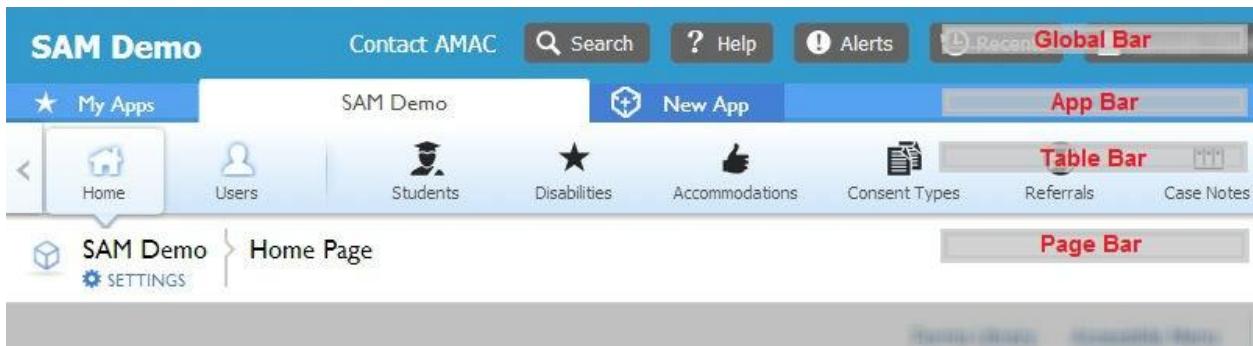

Once you are looking at the new SAM, PLEASE notice that the URL of the page has changed. Before you would see: [www.quickbase.com](http://www.quickbase.com). NOW it will read: amacsam.quickbase.com. If at any time you would like to view SAM using the old version, simply change the "amacsam" portion of the URL to "www" and refresh your browser to make the switch. Re-expand the footer and click "Back to old QuickBase" to achieve the same effect.

The expanded footer.

## Page parts

Once you have SAM opened in the new QuickBase, it's important to note the changes to the page layout. Where before navigation had focused primarily on the application you currently had open (SAM), the new layout splits the navigation into several parts. At the very top of the page, you'll find the Global Bar, which has items pertaining to QuickBase itself. We've highlighted this with a gray box with red letters. While just below you'll find the App Bar, which provides tabs to switch between your applications. Below this, the navigation becomes more familiar with the Table Bar, where you'll find links to your various tables. Finally, below this is the Page Bar, where you'll find links pertaining to the current page.

The page header, with the four navigation bars labeled.

## Table home pages

One key change in the new SAM is the introduction of table “home” pages. Whereas before clicking on a table (students, disabilities, accommodations, etc.) from the Table Bar would reveal links to add and view records and reports, clicking on a table now will immediately take you to the table’s home page. Here, a default report (which can be changed based on roles) lists all records using the default column choices. A panel to the left allows you to quickly filter through the records, while links for reports and creating new records have been moved to the Page Bar at the top.

The screenshot shows the 'Students' table home page. At the top, there's a navigation bar with tabs: Home, Users, Students (which is selected), Disabilities, Accommodations, Consent Types, Referrals, and Case Notes. Below the navigation bar, there's a header with a student icon, the text 'Students', a 'SETTINGS' link, and a 'REPORTS & CHARTS' link. To the right of the header are buttons for '+ New', a pencil icon, and an envelope icon. On the left, there's a sidebar with 'FILTERS' (checkboxes for 'Adv. Search' and 'Status' with options 'Active' and 'Inactive'), 'Service Provider' (set to 'Doug Neal'), and a 'REPORTS & CHARTS' section. The main area contains a search bar labeled 'Search students' with a magnifying glass icon. Below the search bar is a table with columns: ID, Name, Status, Phone, and Email. Two rows of data are visible, each with edit and eye icons.

*The Students table home page contains a default report. Links for reports and new students are at the top and filters are in a pane to the left.*

In the case that there are too many records to view at once you'll be faced with a search page rather than the default report and filters pane. The area for Reports & Charts will be expanded, giving you the option to simply open a saved report instead.

The screenshot shows the 'Accommodations' table home page. At the top, there's a navigation bar with tabs: Home, Users, Accommodations (selected), Disabilities, Accommodations, Consent Types, Referrals, and Case Notes. Below the navigation bar, there's a header with a thumbs-up icon, the text 'Accommodations', a 'SETTINGS' link, and a 'REPORTS & CHARTS' link. To the right of the header are buttons for '+ New' and a magnifying glass icon. On the left, there's a sidebar with a 'Common' section containing a list of accommodation types. The main area contains a search bar labeled 'Search reports & charts' with a magnifying glass icon, and a button for '+ New'.

Show accommodations where

all  of these conditions are true

<Some field>  contains

*The Accommodations table home page. The Reports & Charts area has been expanded. Below it, search options allow you to filter through accommodations.*

## Viewing a report

As mentioned earlier, reports are now accessed by clicking the Reports & Charts link in the Page Bar of a table. Once a report is open, you'll notice that the edit and view buttons have been replaced respectively with a pencil and eye icon, while links previously in the header of the table have been moved to the Page Bar. To the right of the More button, a wrench icon now takes the place of the Customize this Report link.

The screenshot shows the 'All Students' report within the 'Students' table. The top navigation bar includes tabs for Home, Students, Disabilities, Accommodations, Consent Types, Referrals, Case Notes, and Tasks. Below this, a breadcrumb path shows 'Students > All Students' with a 'REPORTS & CHARTS' link. A green '+ New' button is on the left, and a red circle highlights the 'More' button with a wrench icon on the right. The main content area displays a table titled '13 Students' with columns for ID, Name, Status, Phone, Email, Service Provider, and Enroll. Each row has a small edit/pencil icon and a view/eye icon at the beginning. The entire screenshot is circled in red.

*The All Students report within the Students table. Links that have been changed are circled in red.*

## Viewing records

As was the case when viewing a report, links at the top of a record have been moved to the page bar. The exception to this is the link to return to the report (previously labeled Done) and the link to go the next record. In addition, although these links had previously appeared at the bottom of the record as well as the top, they've been omitted with the update.

The screenshot shows a single student record with ID #12345678. The top navigation bar and breadcrumb path are identical to the previous screenshot. The 'More' button is highlighted with a red circle. To its right, 'Return' and 'Next' links are circled in red. The record itself has a yellow star icon and several status indicators.

*The Return and Next links at the upper right side of a record.*

The Copy This link, which was also at the bottom, can now been found under the More button in the Page Bar.

The screenshot shows a single student record with ID #12345678. The top navigation bar and breadcrumb path are identical. A red circle highlights the 'More' button. A dropdown menu is open from it, showing options: 'Copy this Student' (which is bolded), 'New notification...', and 'Print'. The rest of the page shows a list of other student records.

*The link to copy the record, found under More in the Page Bar.*

For records with section headings, clicking on the arrow next to the heading will now allow you to minimize the area.

The screenshot shows a software interface with several sections. At the top, there are three collapsed sections indicated by yellow arrows pointing right. Below them, the 'Disabilities' section is expanded, showing its content. The 'Accommodations' section is also expanded. The 'Consent Types' section is collapsed, indicated by a blue arrow pointing down. A button labeled 'Add Consent Type' is visible. A table with columns 'Type', 'Name', 'Address', 'Phone', and 'Email' is shown, with a single row entry. A message 'No consent types found' is displayed below the table.

*A record with some of its sections minimized.*

To add a new student, you'll simply select the green “+ New Student” rather than select the “Student” table and from the drop down list select “add student”.

The screenshot shows a software interface with a navigation bar at the top featuring tabs for 'Referrals', 'Case Notes', 'Tasks', and 'Tests'. Below the navigation bar, there is a search bar with the letter 'S' and a 'Grid Edit' button with an envelope icon. A prominent green button in the center is labeled '+ New Student'.

*The + New Student link at the upper right side of a record.*

**We are here to support you as you support students with disabilities!**  
**Do not hesitate to call us if you have any questions during this process: 866-279-2964**  
**REMEMBER: We'll go “LIVE” on this new SAM, March 15 2013**
