# Getting Files from AMAC

Disability Service Providers can now download book files and assistive technology software directly from AMAC. It's the latest effort from AMAC to make our services more user friendly. By cutting out the middle man, we have given DSPs more control over when and how materials are delivered to students

Notification of Completed Order

When an order for alternative media is completed, an email will be sent to the DSP letting them know that the order is ready to be downloaded. The email will include a direct link to the order in NEON and will also include an image of the order from the NEON database.
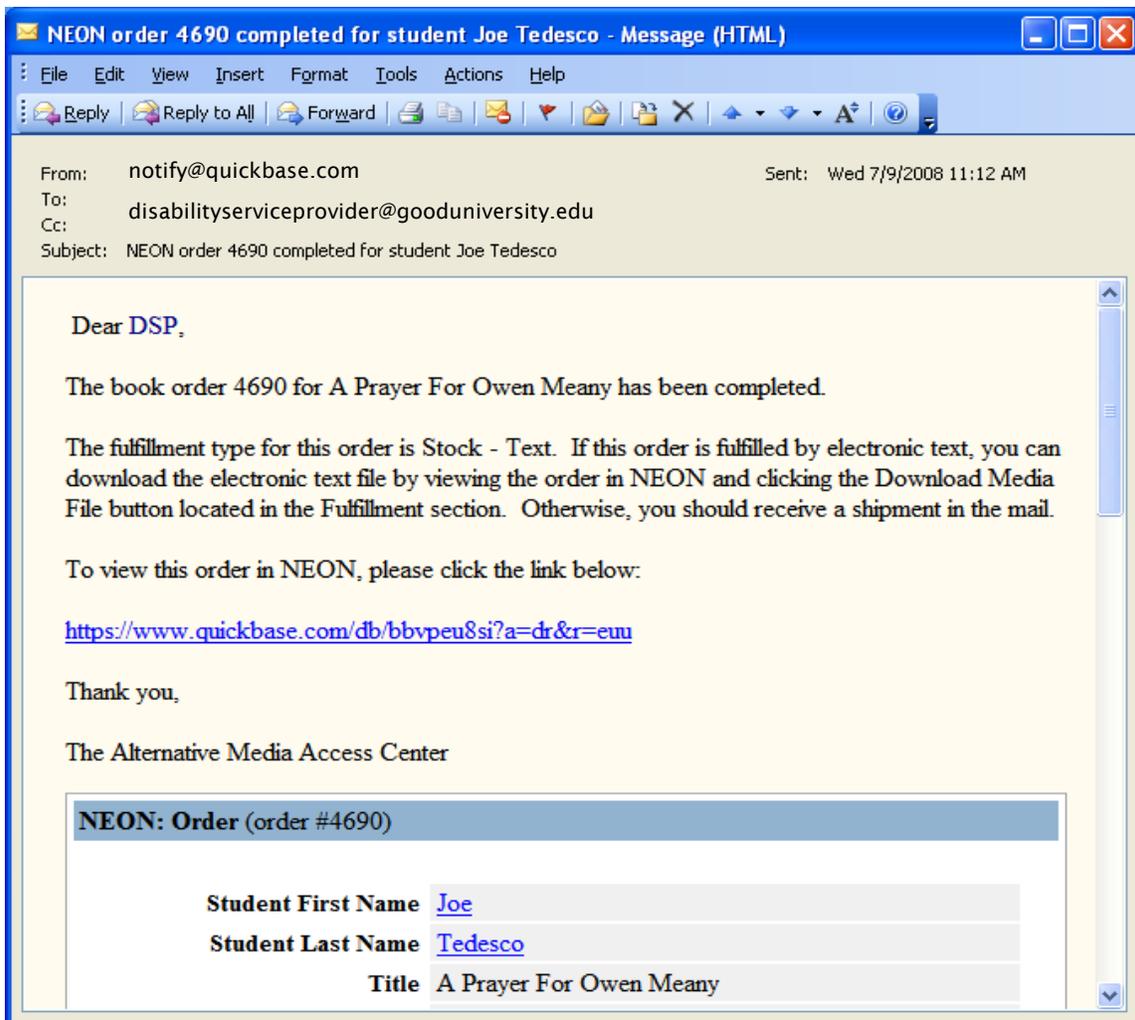

By logging into NEON, DSPs will be able to view the order status and <u>download</u> the alternative media directly from the order record.

You will be asked to save the file to your computer. Select "Save to Disk" and click "OK"

Choose a location to save the downloaded file. Click the "Save" button to save the book to your computer. Be patient, it may take a few minutes to download.
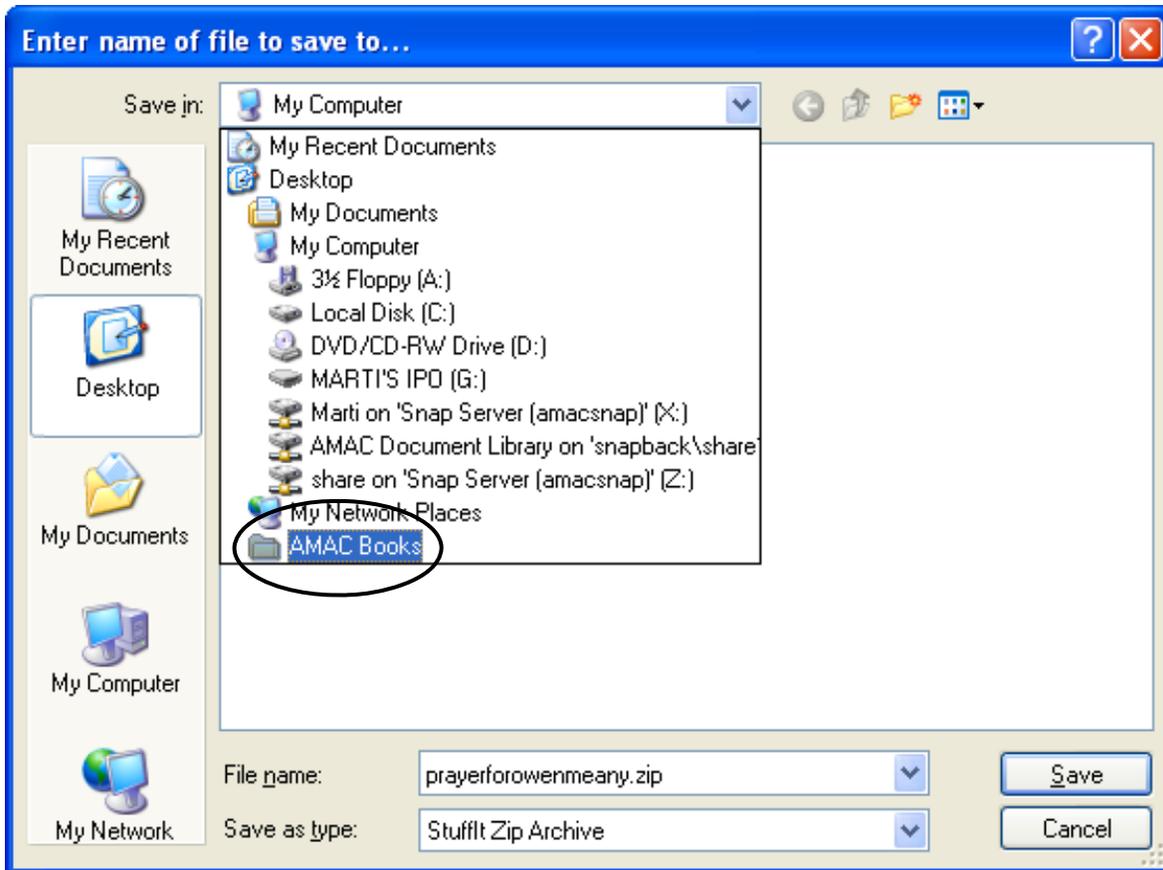

Downloading Software

DSPs will be able to download software directly from AMAC by clicking on the "Download Assistive Technology Software" link at the bottom of the NEON Dashboard.
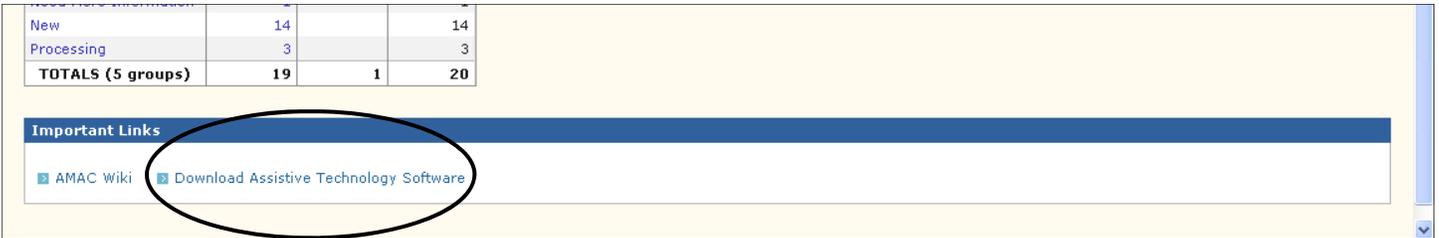

There are several ways to find your software:

❶ Download the most popular software from the front page

❷ View a list of additional software to download

Download and save the software to your computer (usually to the desktop) using the same method as downloading a book file. Then run the software by double-clicking the software icon and following your computer's install wizard.

The following Assistive Technology Software is available for download from NEON:

	Victor ReaderSoft 2.0	Use to open and listen to RFB&D audio files on your computer.
	Literacy Productivity Pack	A suite of applications that provide support for reading, writing, and math.
	PDF Equalizer	Use to open and read .pdf files
	E-Text Reader	Use to open and read .doc, .rtf and .txt files such as Microsoft Word documents.
	Universal Reader Plus	Use to open and read emails, web pages, or any highlightable text.
	Premier Predictor Pro©	Premier Predictor Pro© is a word prediction program that works with every program on your computer.
	Talking Word Processor	This is an easy-to-use, fully-functional word processor with text-to-speech capability.
	PDF Magic Pro©	PDF Magic Pro© can convert all types of PDF files (including encrypted files) into Microsoft Word, RTF, HTML, or TEXT files.
	Scan and Read Pro©	Scan and Read Pro© is a full-powered scanning application with full voice capabilities for reading, combined with electronic document creation with easy-to-use controls.
	Text-to-Audio©	Text-to-Audio© is an application that can take text files and convert them to multiple standard audio formats (e.g. WAVE, MP3). All audio files can be saved to other media and played on other audio devices or systems.
	Ultimate Talking Dictionary©	This is a talking dictionary that includes an unabridged dictionary and thesaurus.
	Scan and View©	Scan and View© is an alterative to closed circuit television and a great aide for anyone needing magnification.
	Magnify It	Magnify It turns your mouse into a magnifier. It has an adjustable magnification size and levels can be toggled on and off.
	Talking Calculator	A handy talking calculator with large keys and contrasting colors that displays your entries and results as you work.
	Text Cloner Pro©	Text Cloner Pro© is a scanning package designed to work with your screen reader's own voice capabilities (e.g. JAWS, Window-Eyes). It has a full optical character recognition (OCR) engine as well as a built-in spell-checker.
	Additional Voice Files	Many software reading programs allow the user to choose the reading voice for the computer.
